

“TREASURE MATE II” SPEAKER AMPLIFIER SYSTEM

“Treasure Mate Amplifier II” to suit VLF / PI Metal Detectors can also be used as utility amplifier for electronic projects.

TREASURE MATE II will suit other detector types including many VLF detectors and Minelab PI machines. [Will also suit SD / GP / GPX series of Minelab](#). Can also be used as generic utility amplifier for projects. The TREASURE MATE II uses a 9 volt battery preferably **alkaline** and works directly inline with your headphones. Just plug your headphones into the TREASURE MATE II if desired or just use the inbuilt quality speaker and then plug the TREASURE MATE II into the headphone jack of your detector. It also has a bypass on / off switch and volume control to suit your hearing level.

To install battery simply unscrew the 4 screws on the back and carefully open the unit. Clip and install battery and replace cover.

The unit also has a clip on the back to attach to belt or your harness.
