

## ***TREASURE MATE V.3 SPEAKER AMPLIFIER SYSTEM***

**“Treasure Mate Amplifier V.3” to suit VLF / PI Metal Detectors can also be used as utility amplifier for electronic projects.**

TREASURE MATE V3 will suit other detector types including many VLF detectors and Minelab PI machines. [Will also suit SD / GP / GPX series of Minelab](#). Can also be used as generic utility amplifier for projects. The TREASURE MATE V3 uses a rechargeable 9 volt battery and works directly inline with your headphones. Just plug your headphones into the TREASURE MATE V3 if desired or just use the inbuilt quality speaker and then plug the TREASURE MATE V3 into the headphone jack of your detector. It also has volume control with switch to vary volume to suit your hearing level.

**DO NOT FORGET TO CHARGE THE BATTERY AFTER THE DAYS USEAGE. FULLY CHARGED TAKES ABOUT 2 HOURS. WHEN STORING FOR ANY LENGTH OF TIME ONLY CHARGE FOR ABOUT HALF AN HOUR AND DO THIS EVERY MONTH OR SO**

YOU CAN ALSO USE NON-RECHARGEABLE TYPES IN THIS UNIT EG THE ALKALINE 9 VOLT BATTERY.
